Conclusion

- Ownership type:
 - ✓ State-owned banks are the most profitable for the sample and for the center located banking sub-group, in particular
 - ✓ Foreign banks are the least profitable for the sample and for the center located banking sub-group, in particular
- Regional structure and branch networks:
 - ✓ Multiregional banks are the most profitable for the sample and for the state-owned and private banking sub-groups, in particular
 - ✓ Center located banks are the least profitable for the sample and for the private banking sub-group, in particular
- Macroeconomic factors:
 - ✓ Macroeconomic factors increase significance of other variables
 - ✓ Sensitivity to macroeconomic factors depends on ownership type and regional structure
